**Bacteriological Monitoring Requirements
Not Met for Rancho Del Rey Golf Club During the
Third and Fourth Quarter of 2024**

Our water system recently violated a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and what we did to correct the situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the third and fourth quarter of 2024, we did not meet all monitoring requirements for coliform bacteria and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

- **You do not need to boil your water or take other corrective actions.**
- The table below lists the contaminant we did not properly test for during third and fourth quarter 2024 and how many samples we are required to take and how often, how many samples we took, when samples should have been taken, and the date on which follow-up samples will be taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples will be taken
Coliform bacteria	2/Quarter	0	3 rd & 4 th Quarter 2024	2/Month starting in March 2025

- If you have health issues concerning the consumption of this water, you may wish to consult your doctor.

What happened? What is being done? 3rd/4th Quarter Water Samples were missed. Monthly Testing will occur.

Description of corrective action: Test water as directed by State Water Board.

We anticipate resolving the problem within the estimated time frame: 6/30/25
